

# HVAC and Energy-saving Product Rebates

## Indiana

### ▶ Ductless Heat Pump / Mini Split

Rebates up to \$570

Go ductless and save up to 60% on your heating cost! Plus, get air conditioning! A ductless heat pump or mini split is perfect for homes with electric baseboards, ceiling heat or an electric furnace. It is ultra-quiet and provide maximum year-round comfort and control while cutting your heating and cooling costs 30% - 60%!

### ▶ IM Home + a Smart Thermostat

Up to a \$330 Rebate

More than 50% of your energy bill is from heating and cooling your home! IM Home makes a Wi-Fi smart thermostat smarter and can reduce your energy bill by about \$150 annually. Plus you reduce your carbon footprint and get up to \$330 in rebates and bill credits.

### ▶ Heat Pump Water Heater

\$350 Rebate

Heat pump water heaters do not create their own heat like a traditional water heater. Think of it like a refrigerator working in reverse. Heat pump water heaters give three times the energy savings as traditional water heaters.

### ▶ Air Source Heat Pump

Rebates up to \$500

A heat pump can heat, cool and dehumidify your home. It can cut your heating cost by about 50% and your cooling cost by about 25% compared to electric furnace, baseboard or ceiling heat. Newer technology, makes a heat pump a smart energy-saving option - even in cold climates.

## ▶ Wi-Fi / Smart Thermostat

**Rebates up to \$70**

A Wi-Fi smart thermostat allows you to control your home's temperature from anywhere, anytime. A smart thermostat learns your schedule to customize a home energy plan and give you energy savings.

## ▶ Central Air Conditioner

**Rebates up to \$400**

Today's air conditioners use about 50% less energy as air conditioners made in the mid-1970s. Even if your air conditioner is only 10 years old, it might be time to upgrade. You can save up to 40% of your cooling energy costs by replacing it with a newer, more efficient model.

## ▶ Electronically Commutated Motor (ECM) Furnace Fan

**\$150 Rebate**

Furnace fans are among the home's biggest energy users. Traditional furnace motors operate at a constant speed. An ECM (electronically commutated motor) is a more efficient furnace motor with speed and torque controls built in. This allows the motor to adjust its speed to ensure optimal air flow at all times while using about 30% less energy.

## More Ways To Save!

**Get \$40 for Your Fridge:** Recycle and save energy! We'll give you \$40 and pick up your old working fridge or freezer – for no cost. Call 800-253-5661 to schedule your pick up.

**Weatherproof Your Home:** Get a Home Energy Checkup – a \$430 value. Our BPI certified energy expert will check your insulation. Plus, install LEDs, showerheads, pipe wrap and more! If you have electric heat, I&M may pay 50% - 100% of the upgrades. Call 855-231-5274 to schedule your checkup.

**Get a \$25 Energy-saving Kit:** Find out how your home uses energy, plus get tips on how to save more. Once you take the Online Checkup, the kit will be mailed to your home. It contains LED bulbs and other things to help you save energy. Take the checkup at [ElectricIdeas.com/OnlineCheckup](http://ElectricIdeas.com/OnlineCheckup).
